3 MATERIAL ACCOUNTING POLICY INFORMATION

The Company adopted Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statements 2 'Making Materiality Judgements') from July 1, 2024. Although amendments did not result in any changes to the accounting policies themselves, they impact the accounting policy information disclosed in the financial statements. The amendments require disclosure of 'material' rather than 'significant' accounting policies. The amendments also provide the guidance on the application of materiality to disclosure of accounting policies, assisting entities to provide useful entity specific accounting policy information that user need to understand other information in the financial statements. The material accounting policies set out below have been applied consistently to all periods presented in these financial statements.

3.1 Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity where the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases. The acquisition method of accounting is used to account for business combinations by the Group. The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- fair values of the assets transferred;
- liabilities incurred to the former owners of the acquired business;
- equity interests issued by the Group;
- fair value of any asset or liability resulting from a contingent consideration arrangement, and
- fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Group recognises any noncontrolling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the noncontrolling interest's proportionate share of the acquired entity's net identifiable assets.

3.2 Subsidiaries

Subsidiaries are those entities over which the Group has control. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has: – power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee); – exposure, or rights, to variable returns from its involvement with the investee; and – the ability to use its power over the investee to affect its returns

3 Intangible assets and Goodwill

when it is probable that future economic benefits attributable to that asset will flow to the Group and the same is amortised applying the straight line method at the rate disclosed in note 6 to these consolidated financial statements. Research and development expenditure that do not meet the criteria mentioned in IAS 38 'Intangible Assets' are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Such expenses are charged to the consolidated statement of profit or loss, as and when incurred. The assets' residual values, useful lives and amortisation methods are reviewed at each reporting date, and adjusted if material.

4 ACCOUNTING ESTIMATES, JUDGMENTS AND FINANCIAL RISK MANAGEMENT

The preparation of this condensed interim financial information in conformity with approved accounting standards requires management to make estimates, assumptions and use judgments that affect the application of policies and reported amounts of assets and liabilities and income and expenses. Estimates, assumptions and judgments are continually evaluated and are based on historical experience and other factors, including reasonable expectations of future events.
